Chaos

What did we learn?

... about innovative labour organisation

... about spatial planning

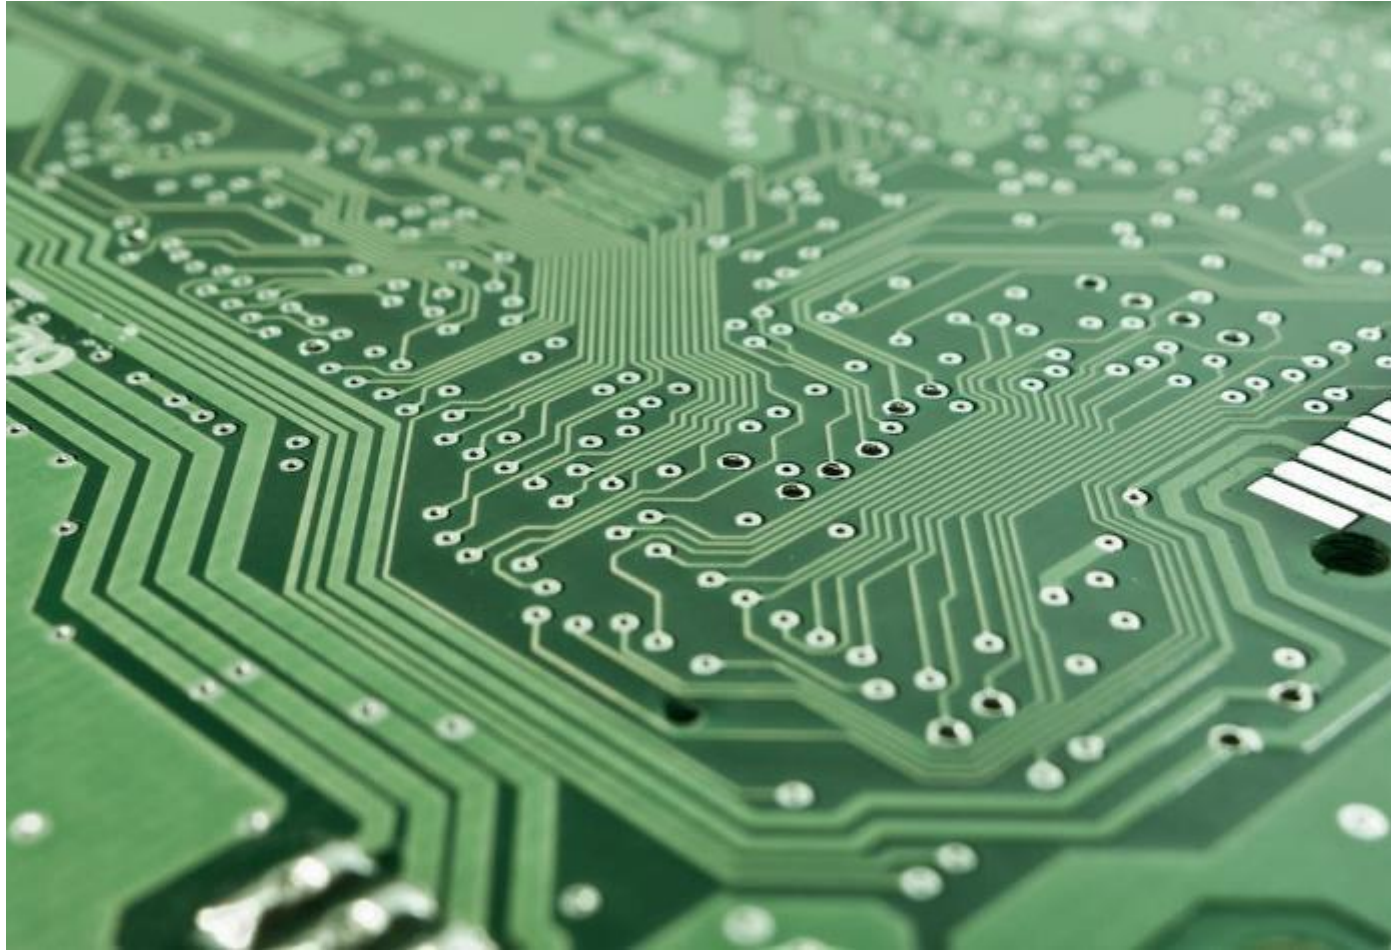

... about life in care centers

... about care

... about innovation

... about palliative care

Some policy recommendations

1. The division of competences wasn't helpful at all

2. Create a new harmonised funding model for welfare and care that promotes de-scaling and empowerment of care organisations

3. A resolute choice for integrated care and networks. Supporting cooperation by simplifying structures, providing regulatory clarity, geographical alignment and smart digitalisation

4. Formulate an adequate response to the search for employees with attractive care professions and innovative, flexible work organisation

Thank you!
